can't launch, loop with steam popup saying "preparing to launch". Grid is the collection of sequels to NFS Pro Street you never thought you needed.. bro screw ravenwest. This game's AI belongs in a Demo Derby game.

You cant turn a single corner without them going for a dive bomb even though they're 2 years behind you and they have 0 chance of making it.

Except they do make it since they'll also do a friendly pit maneuver on your as5 for good measures.

Forza Horizon 4 online has drivers less aggressive than this game's AI..... The game has some nice features for inexperienced players, including steering guidance on the track, the option to reverse time and try again if you crash or blow a turn, many difficulty levels for the other racers, and other settings.

It works on Linux too! (protip: when the launcher comes up, pick your graphical settings then check the box in the lower-left to disable the launcher. Quit and start the game over. The game crashes if you play it from the launcher, but runs fine once you play it with the launcher disabled).
